# EMC App Transfer Guide

Step 1: Download and Unzip the File

1. Download the zip file from Google Drive and navigate to the folder where it's saved.
2. Right-click the file and select "Extract All" to unzip it. You should now have an unzipped folder containing the Unity project.

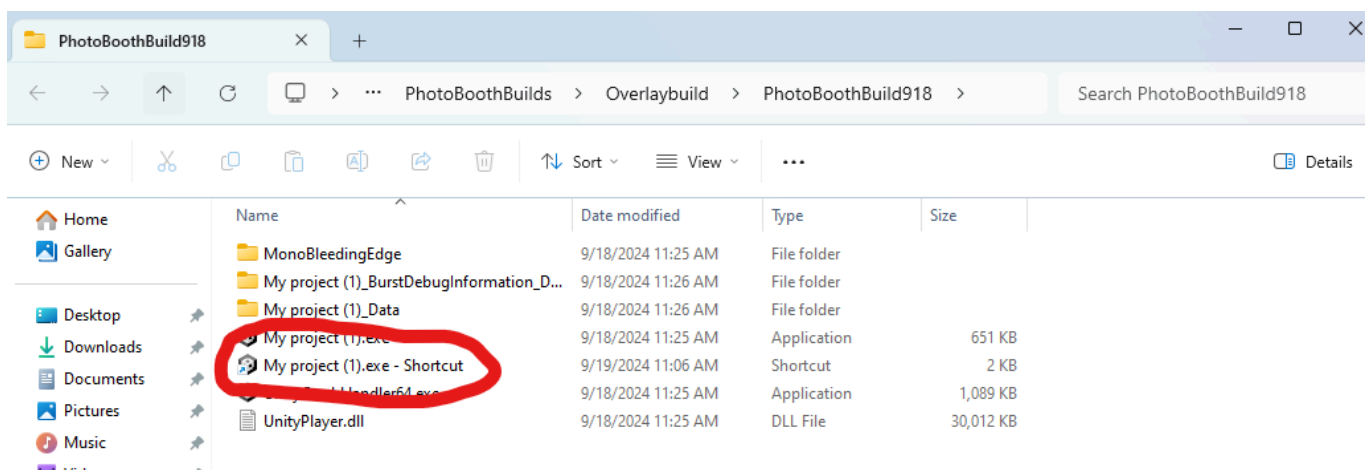

Step 2: Locate the Executable File

1. Open the unzipped folder named "PhotoBoothBuild918."
2. Inside, locate the file named "my project (1).exe."

Step 3: Create a Shortcut for the Application

1. Right-click on the "my project (1).exe" file.
2. Select **Show More Options** → **Create Shortcut**.
3. A shortcut should now appear in the same folder.

Step 4: Add the Shortcut to Startup

1. To ensure the application automatically launches when the PC starts, add the shortcut to the startup folder.
2. Open the **Windows Start** menu, search for **Run**, and press **Enter**.
3. In the Run window, type "shell:startup" and press **Enter**.

Step 5: Move the Shortcut to the Startup Folder

1. If there is an existing Unity shortcut in the Startup Folder, delete it
2. Move the new shortcut into the folder
